Subject: CES: Stormwater Drainage Piping
Date: Wednesday, May 06, 2015 9:10:00 AM

James:

I had someone from the City of Houston – PWE come out this morning with a complaint notice and PWE direction to remove the storm water piping that I installed the other day to allow overflow from the TCEQ installed sedimentation pond (diking). He had a notice that indicated that I had to remove the piping within 3 days.

Unfortunately, I was kind of belligerent with him so I apologize but I told him that I would not accept the complaint nor would I remove the piping. I told him that I had been in communication with Dorene Hancock and James Cargas on the issue and they were aware of what was installed.

Thanks
